

THE ULTIMATE SECURITY & SMART GARAGE BUNDLE

Garages are common places for thieves to enter houses and in the past, they have not been particularly secure. With Centurion Garage Doors this is not the case. The safety of all families are as important to us as the safety of our own families.

THE MY CGD SMARTPHONE APP & CAMERA OPENER

- Operate the garage from anywhere via a Smartphone and the MY CGD App.
- Allows for contactless access to the garage for parcel and goods delivery, trade access and more.
- Give temporary access to visitors, then revoke the permissions when they're done. Nobody even needs to be home!
- The built in camera gives peace of mind knowing the home is secure and can be viewed at any time.
- Tracks the health of the garage door to know when it is next due for a service.
- Alerts and notifications are sent about garage activity to ensure the garage is secure.

THE CENTURION LATCH LOCK

The Centurion Latch Lock is one of the most secure Sectional Garage Door Locks available on the market. When closing the garage door it lifts up and over the latch, hooking into position which makes it impossible for anyone to lift the garage door manually, or manipulate the lock.

- **Security**
- **Safety**
- **Low Cost**
- **Effective**
